🛡️ APPLICATION SECURITY & GOVERNANCE

- Cyber risk and control assessment
- SDL, secure code, and binary reviews
- Identity, privacy, and DLP controls
- AI governance

🏢 INFRASTRUCTURE & OPERATIONS

- Lab, facility, and database reviews
- Cloud readiness and migration
- Hardware R&D and datacenter energy
- Enterprise and supply-chain controls

👤 LEADERSHIP & DELIVERY

Stakeholder alignment ·
Executive communication ·
Team coaching · Scoping · Requirements ·
Workflow mapping

🔧 TOOLS & METHODS

Workflow automation · Data analysis ·
Dashboard development · KQL/Kusto ·
Power BI · Azure · Copilot Studio ·
Microsoft Foundry · Azure Data Explorer ·
Log Analytics · Azure DevOps

💖 COMMUNITY LEADERSHIP

Penn State IST Alumni Society

Member, Board of Directors · 2018 - 2026

Organized alumni-student programs, including IST ConnectX, iConnect Live, and Hackathon 101. Led student workshops and technical learning sessions.

🎓 EDUCATION

Penn State University

B.S., Information Sciences and Technology

🌐 LANGUAGES

English · Russian

Nikita Page

Security & Risk Programs · Cross-Functional Technology Leadership

Security and technology-risk leader with 10 years across eight industry sectors, known for taking complex, cross-team risk problems from ambiguity to executive decision. Runs a dozen engagements a year at Microsoft, primarily across LinkedIn, Xbox, and Copilot, scoping the work, leading rotating teams of 8-12, aligning dozens of engineering and business stakeholders, and presenting to corporate vice presidents. Application-security depth, extended into cloud, AI governance, hardware R&D, and datacenter infrastructure; builds the AI workflows and trains the people who use them.

EXPERIENCE

Senior IT Audit Manager

Microsoft · Remote

March 2021 - Present

Lead security, AI, and operational-risk engagements across Microsoft's product, engineering, and infrastructure organizations, from scoping through executive reporting. Engagement reports are distributed to the CFO.

- Lead rotating teams of 8-12 through risk analysis, testing, and reporting; develop issues into a business case framed by likelihood and financial and reputational impact, and win commitment from directors and corporate vice presidents to invest in remediation.
- Established a secure-development landscape baseline for gaming audit planning following Microsoft's Activision Blizzard acquisition, coordinating discovery across ABK, ZeniMax and Minecraft.
- Designed and built an AI-enabled evidence review hub that maps evidence to controls and risks and automatically updates risk narratives, with agent access scoped to data-loss-prevention rules.
- Led AI enablement for the Internal Audit department, showing ~200 audit, risk, and compliance professionals how to apply AI across planning, fieldwork, and reporting to streamline repetitive work; directed 13 contributors and personally built the demo chatbots and interactive demo audit.
- Structured advisory on the Azure migration of services from two acquisitions, building the planning matrix from scratch, running weekly technical learning sessions, and aligning recommendations on responsibilities and readiness with a senior executive.
- Work across more than ten domains, including cloud, secure development, identity, privacy, AI governance, custom-silicon R&D, datacenter energy and capacity, and supply chain, ramping quickly into each to evaluate controls with engineering teams on their own terms.
- Built hands-on technical depth through that work, including code review, KQL/Kusto test plans, third-party binary analysis, and Power BI and Azure Data Explorer dashboards, and translate it into plain-language risk narratives for executives and technical learning sessions for peers.

IT Audit Consultant

Verizon

April 2019 - May 2020

Assessed telecommunications infrastructure, engineering processes, and cloud environments for security, operational, and control risk. Built tracking and reporting tools that gave stakeholders visibility into open issues and drove remediation follow-through.

IT Advisory Associate

KPMG

June 2017 - May 2019

Delivered technology-risk and control assessments for small and large banks, insurers, and fashion, beauty, and grocery-retail clients. Evaluated databases, ERP implementations, and regulatory compliance requirements across varied client environments.

Founder & Principal Consultant

Nikita Page Productions LLC

May 2020 - Present

Advise startups and small businesses on technology strategy, architecture, and early-stage product requirements. Lead discovery, workflow design, and prototyping with founders to turn early ideas into buildable plans.
